

Matjack Factory Training Class Jumbo Safe Lift Cushions

Matjack is pleased to announce the dates for the 2012 Factory Training/Certification Class. This year in Syracuse, New York
August 11, 2012 to August 12, 2012

Class Instructors

Jeff Martin

Lead Instructor
Howard L. Eagan

Jamie Dougherty

This class offers attendees the most comprehensive in-depth practical use of air bags/cushions offered anywhere in the US and Canada.

This will be an intensive two day class involving both classroom and practical instruction by several factory certified trainers who have extensive "in the field" resumes with the use of this equipment.....featuring Internationally recognized industry trainer Howard L. Eagan. In addition to Mr. Eagan, Jeff Martin and James Dougherty of BTR Training & Consulting, along with John Sweezy JR President & CEO of Matjack/International Wreckers Jumbo Safe Lift.

Additionally, attendees will also have the opportunity to be trained on the use of *Landing Cushions*, which is the newest pneumatic technological advancement into the recovery field.

No matter what brand of bags/cushions you or your personnel are using, this class will be informative.

Haven't used your bags/cushions in awhile? Do you have personnel that haven't had the opportunity to be formally trained/certified? Maybe need a refresher? Looking for other uses/avenues of revenue?

If you are considering the purchase of this type of equipment, then this class is a must. The training personnel on hand will be able to answer your questions and concerns in a non-pressure environment.. Again, all personnel have extensive field resumes, not in only controlled environments and no field work experience.

This class is a must prerequisite for the level 2/master certification class we will be conducting in the future which will also include underwater work.

We also plan on doing a few Big Truck Rescue scenarios with the class along with some classroom discussion from the staff of BTR. This information is great to bring back to your community and share with your local emergency services.

Come see why both many large and small companies, municipalities and fire, departments count on this training for their needs. The class is taught in a professional manner utilizing PowerPoint presentation/digital projector.

THIS CLASS ALWAYS HAS SOLD OUT YEAR AFTER YEAR. Whether you are planning on having some of your personnel attend or you yourself, please book early.

Howard "scooby" Eagan is a nationally recognized trainer to both the towing/recovery & rescue professions in the use of air bags/cushions and cross training. A trainer/instructor for Matjack/International wreckers jumbo safe lift cushions, Howard has been involved in the towing/recovery field for over 20 years as both a manager and operator. He is a former rescue squad chief, state extrication instructor, and in the early '90's, developed big truck rescue training programs (www.bigtruckrescue.com). Additionally, Howard is a lead instructor for BTR training & consulting and still works actively in the recovery field @ Big Red Towing, Syracuse NY.

Please note, the lecture/classroom portion of the class will be held in a conference room at the host hotel each morning. A continental breakfast will be served as well as Lunch, then the class will head over together to the practical site.
