The World's Best Cushions!

JUMBO SAFELIFT CUSHIONS AND LANDING BAGS FOR THE RECOVERY SPECIALIST

**FOR OVER 38 YEARS
RECOGNIZED AS THE
LEADER AND INNOVATOR
IN THE AIRBAG INDUSTRY
WITH THE TRACK RECORD
AND PERFORMANCE
TO BACK IT UP!!**

Matjack Lift Cushions-

Reliable, Safe and Easy-to-Use

WHETHER SLOPED TOPPED, FLAT TOPPED, SMOOTH, ROUGH, BIG OR SMALL - WE HAVE SIZES TO FIT ALL YOUR RECOVERY AND RESCUE NEEDS.

**From large lifts to small lifts
MATJACK can provide the
cushion for your needs.**

Jumbo Safelift cushions (invented by Bill Jackson and Fred Noble back in the 1960's) by MATJACK, started in 1981 have proven over time they are not only tough enough to do the work asked of them but to also last for over 25 years if taken care of and stored properly after each use.

Jumbo's are used worldwide including both the Artic Circle and Antarctica.

In 2005, Matjack introduced the Jumbo Turbo cushions, this increased air flow and lowered inflation time over the older systems by 60%!!

In 2017, Matjack introduced the Jumbo Hurricane cushions, this system is capable of lifting overturned tractor trailers in as little as 5 minutes making it the quickest lifting system in the world. The Hurricane system was built not only with faster inflation times in mind but also with understanding the need to quiet the noise at the control bank as much as possible. Moving the bypass valves back to the compressor and adding a muffler system to the control bank, the noise is now located at the compressor cart.

Whether you use the Jumbo Turbo System or the Jumbo Hurricane System, either will always allow you to control and synchronize your air cushions as you lift so you can maximize your efforts which will allow you to save time and lift the load safely.

Matjack lifting cushions work best in cantilever or "hinged" style lifts, but can also be used for vertical lifting if rigged correctly so lateral movement of the weight being lifted is restricted.

The World Best Cushions!

JUMBO CUSHION RECOVERY SETS

Jumbo Hurricane or Turbo cushion sets come in various sizes to meet your individual needs. Each set comes with all the equipment required for set up and operation allowing you to get to work within minutes of arriving at a worksite or accident scene. No matter what set you choose, you get all the unsurpassed quality, service and training you have come to expect from Matjack.

Unmatched Durability and Strength!

Matjack low pressure cushions are made with Hypalon and Neoprene

Jumbo's are the original slope topped bag, designed exclusively to follow a lift all the way up without ever losing contact with ground or the load, Matjack's Jumbo bags are the only cushions manufactured which can make this claim and prove it!

- Unmatched durability and strength, which is why they are the number one choice for among rescue squads, civil defense and military agencies worldwide.

WARNING: This product can expose you to chemicals including, Butadiene, Styrene, Benzene, Hexane, Carbon Black, Toluene, Vinyl, Acetone, Butanone which are known to the State of California to cause cancer and birth defects or other reproductive harm. | 1 | 2"x30' Hurricane Pressure Hose |
| 12 | 30' Hurricane Hoses |
| 2 | Extending Placing Poles |
| 10 | Operator Badges |
| 1 | Repair Kit with adhesive and patches |
| 1 | Two Hour Safety Operating Video & instructions |

Landing Bags

Matjack Landing Bags provide users with the ability to do uprights on tractor trailers without the use of a “catch” truck. **Landing bags work off a constant airflow and need it to stay inflated.** Landing bags work like Jumbo cushions only in reverse, rather than lifting with a cushion of air, Landing bags are placed under a load with the intention of not allowing the load to gain speed during descent. Just like cushions designed to catch people jumping off buildings, Landing bags control vehicles as they come over and allow the air to escape through 3 valves in each cushion increasing control of the vehicle and rate of descent.

Matjack Landing bags are typically used under wheels of vehicles to control descent but have also been used under frame sections to catch box trucks, mobile homes and even track drives on heavy equipment. Each Landing bag is capable of handling up to 40,000 lbs/ 18182 kgs load. Single lane uprights are now accomplished in a much easier fashion with less set up and quicker dismantle time for **those “quick clear incident” situations.** Any upright recovery is now quicker, safer and more professionally done when using **Matjack’s Landing bags!**

Landing Bags

MATJACK LANDING BAGS ARE TOUGH ENOUGH TO HANDLE EVEN THE ROUGHEST, MOST BRUTAL SITUATIONS AND COME OUT UNSCATHED

Matjack Landing bags have been in use now for the last 15 years and are being used in countries around the world with the demand growing every day. Whether you buy a 2 or 3 cushion Landing bag set all your recoveries will be easier and less likely to further damage equipment. Landing bags are made of a special blend material designed to resist tearing but allow quick repair if damaged in the field. Matjack Landing bags have grease/protective covers available if desired keep your set cleaner and more protected from sharp objects.

The large Camlock fittings provide for quick assembly and disassembly of the system. All Matjack Landing bag systems will provide you with years of trouble free use and come with the same outstanding service, training and care you have come to expect from Matjack.
