

# MATJACK / JUMBO SAFE LIFT CUSHIONS

Official 2015 Factory Training Class Announcement

WWW.MATJACK.COM

**class instructors**

Howard "Scooby Eagan"

Jeff Martin

Dale McLaughlin

John Sweezy Jr. (CEO/MATJACK)

**APRIL 18/19, 2015 @ Jae's Towing, Heath, Ohio**

This class offers attendees the most comprehensive in-depth practical use of air bags/cushions offered anywhere in North America. This will be an intensive two day class involving both classroom and practical instruction by several factory certified trainers who have extensive "in the field" resumes in the use of this equipment; featuring internationally recognized industry trainers Howard L. Eagan and Jeff Martin. Both Jeff and Howard developed the Factory training curriculum in addition to owning BTR training & consulting (big truck rescue) which teaches both cross training between recovery and rescue personnel in addition to air bag/cushion training to recovery, rescue, and industrial personnel. Dale McLaughlin, along with his crew at Ritch's towing in Ohio, has over 30 years of field work in both recovery and rescue situations utilizing air cushions. Dale has helped us during the years in product development in addition to providing us with footage and techniques.

Additionally, attendees will also have the opportunity to be trained on the use of **Landing Cushions**, which Matjack was the first to introduce into the recovery realm almost ten years ago.

Haven't used your bags/cushions in a while or have personnel that haven't had the opportunity to be formally trained/certified? In need a refresher? Looking for other uses/avenues of revenue? If you are considering the purchase of this type of equipment, then this class is a must. The training personnel on hand will be able to answer your questions and concerns in a non-pressure environment. Again, all personnel have a **VERIFIABLE** extensive field resume, not that of only controlled environments and no field work. No other training class of this type can make that claim.

We will also be doing the Big Truck Rescue classroom curriculum ([www.bigtruckrescue.com](http://www.bigtruckrescue.com)). This information is great to bring back to your community and share with your local emergency services.

Come see why many major and small companies, municipalities, and departments count on this training for their needs. When the largest general contractor in the world needs training in the recovery of their underground equipment using pneumatic lifting bags, they count on us! The class is taught in a professional manner utilizing PowerPoint presentation/digital projector

**THIS EVENT WILL BE THE ONLY OPPORTUNITY TO ATTEND THE FACTORY TRAINING CLASS FOR THE PROFESSIONAL RECOVERY OPERATOR IN 2015.**

ADDITIONAL CLASS SPONSERS

Your host for the 2015 factory class:

**2015 Air Bag Certification Class cost per student is \$425.00**

*Howard "scooby" Eagan and Jeff Martin are nationally recognized trainers to both the towing/recovery & rescue professions in the use of air bags/cushions and cross training. Both developed the factory training curriculum and are instructors for Matjack/International Wreckers jumbo safe lift cushions. Howard has been involved in the towing/recovery field close to 30 years as both a manager and operator. He is a former rescue squad chief, state extrication instructor, and in the early '90's, began development of the big truck rescue training program ([www.bigtruckrescue.com](http://www.bigtruckrescue.com)). Additionally, both Howard and Jeff are lead instructors and owners of BTR training & consulting. Both still work actively in the recovery field; Howard @ Big Red Towing, Syracuse NY and Jeff @ Diamond Towing, Bolton, Ontario, Canada. More importantly, both have extensive infield use of pneumatic lifting devices in recovery, rescue, and industrial applications.*
